

A METHOD AND SYSTEM FOR INSTALLING DIFFERENT COMMUNICATIONS  
JACKS INTO AN INTELLIGENT DATA CONCENTRATOR

ABSTRACT OF THE INVENTION

5

Embodiments of the present invention facilitate coupling electronic devices to an intelligent data concentrator. The intelligent data concentrator is operable for multiplexing data signals from a plurality of client devices to a network interface using client interfaces. Embodiments of the present invention 10 include a faceplate which can hold interface adapters. The interface adapters hold the client interfaces in a substantially fixed position relative to the faceplate.
